

AUGUSTO CAPELLO

presents

An innovative multifunctional project for PUBLIC and PRIVATE uses aimed at the highest level of security regarding the IDENTITY/AUTHENTICITY of PERSONS, THINGS, THE I.T. WORLD, etc. called

QUANTRONIC CITY

The scientific basics are symmetrical to the laws of quantum mechanics so as to be able to defend the reference environment via hybrid

"UNCLONABLE ONE-TO-ONE MEMORY"

protocols.

The "CHECKATOM IDENTIMETRIC" system, which I invented, allows for an infinity of applications and solutions to problems as yet unsolved (but not for this reason secondary problems) when, for example IDENTITY CERTIFICATION

is the target of cloning for any reason.

PUBLIC USES/CITIZEN'S SERVICES

• The following documents: IDENTITY CARDS – PASSPORTS – RESIDENCY PERMITS – FIREARMS LICENCES – INSURANCE DOCUMENTS – PUBLIC CERTIFICATION – BIOMETRIC ACCESS.

INDUSTRIAL USES

• The most varied of possibilities for every kind of product representing the "MADE IN ITALY" category.

BANK SERVICES

• Credit cards without any legible information, an absolute guarantee of security and privacy. The system called CRYPTOCHECK includes various subsystems intended for uses including instantaneous statistical relaunch to allow central authorities to monitor financial transactions: IMG5 model (Instant Money Graphic Stream).

• CREDIT PASS without paper at the POS.

HOSPITAL SERVICES

• Protection of patients' records through illegible hybrid photo-algorithms.

• Card dedicated to the security of nursing/surgical operations and machine access.

• Patient bed with internal or external multi-service access.

PHARMACEUTICAL ANTI-COUNTERFEITING

• Using the special Q-BIOSCAN system.

ARTISTIC USES

• Quantum badges/various canvasses – papers – modules for artists: recognition and memory of both the work and its owners. Unclonable authors' signatures.

• Furthermore, "MADE IN" products regarding fashion houses and manufacturers and distributors of jewellery and luxury articles.
